

Healthcare Consultation Summary

Patient Name: John Doe

Date of Consultation: October 15, 2023

Referring Physician: Dr. Smith

Specialist: Dr. Jane White

Reason for Consultation:

The patient presented with chronic abdominal pain and unexplained weight loss over the past three months.

History of Present Illness:

John reports intermittent abdominal pain, primarily in the lower abdomen, with episodes of nausea. He has lost approximately 10 pounds during this period.

Past Medical History:

History of hypertension and controlled diabetes. No prior gastrointestinal surgeries.

Examination Findings:

- Vital Signs: Stable
- Abdomen: Tenderness in the lower quadrants, no rebound tenderness
- Other systems: No abnormalities noted

Investigations:

Abdominal ultrasound and blood tests were ordered to evaluate for possible causes of the symptoms.

Impression:

Suspected gastrointestinal condition requiring further investigation.

Plan:

- Schedule a follow-up appointment in two weeks to discuss test results

- Consider referral for gastrointestinal endoscopy if symptoms persist

Signature:

Dr. Jane White, MD
