

Genetic Testing Counseling Questions for Discussion

Dear [Recipient's Name],

As we prepare for our upcoming genetic counseling session, please consider the following questions to facilitate our discussion:

Personal and Family History

- What is your understanding of your family's genetic history?
- Are there specific health conditions in your family that concern you?

Motivation for Testing

- What prompted your interest in genetic testing?
- How do you feel that genetic testing could impact your life?

Expectations and Concerns

- What are your expectations from the genetic testing process?
- What concerns do you have about the results of the genetic test?

Decision Making

- Who else will be involved in the decision-making process regarding testing?
- Are there specific questions you would like answered during our session?

Thank you for considering these questions. I look forward to our meeting and assisting you in this important journey.

Sincerely,

[Your Name]
