

# Hospital Discharge Summary

**Patient Name:** John Doe

**Patient ID:** 123456

**Date of Admission:** January 1, 2023

**Date of Discharge:** January 7, 2023

**Referring Physician:** Dr. Sarah Smith

**Consulting Cardiologist:** Dr. Michael Johnson

## Diagnosis

1. Congestive Heart Failure

2. Atrial Fibrillation

## Summary of Hospital Stay

The patient was admitted with worsening shortness of breath and palpitations. Initial evaluation included ECG and echocardiogram, which confirmed the diagnoses. The patient was started on diuretics and beta-blockers with significant improvement.

## Medications at Discharge

- Furosemide 40 mg daily
- Metoprolol 25 mg twice daily
- Warfarin 5 mg once daily

## Follow-up Care

The patient is advised to follow up with the cardiology clinic in two weeks. Monitor weight daily and report any significant weight gain, increased swelling, or worsening symptoms.

## Patient Education

Discussed the importance of medication adherence, low-sodium dietary choices, and regular physical activity as tolerated.
