Subject: Implementation of Agile Development Process

Dear Team,

I am excited to announce the implementation of an Agile Development Process within our cross-functional teams. This approach aims to enhance collaboration, increase flexibility, and accelerate delivery.

## Key Principles of Agile:

- Customer satisfaction through early and continuous delivery of valuable software.
- Embrace changing requirements, even late in development.
- Deliver working software frequently, with a preference for shorter timescales.
- Close collaboration between business stakeholders and developers.
- Motivated individuals who are trusted to get the job done.

We will conduct regular sprint planning sessions, daily stand-ups, and retrospectives to ensure continuous improvement and adjustment as needed. Your engagement and feedback will be critical throughout this transition.

Looking forward to your active participation and collaboration.

Best Regards,
