Subject: Breakdown of Interview Methodology

Introduction

This document outlines the methodology used for conducting interviews as part of our research study on [insert topic].

Objectives

- To gather in-depth insights on [specific topic].
- To understand participant perspectives and experiences.

Methodology Overview

The interviews will be conducted using a semi-structured format that allows for flexibility while ensuring all relevant topics are covered.

Participant Selection

Participants will be selected based on [criteria for selection]. We aim to include a diverse range of voices to ensure a comprehensive understanding of the topic.

Data Collection

Interviews will be conducted via [in-person/phone/video conferencing] and will be recorded with participant consent for accuracy in data collection.

Analysis

The gathered data will be analyzed using [mention analysis method], ensuring to identify key themes and insights from the participants' responses.

Conclusion

This methodology is designed to ensure an effective and ethical approach to gathering qualitative data, providing valuable insights for our research.

Next Steps

We look forward to your feedback on this methodology breakdown and to discussing any potential adjustments.
