

Welcome to the Team!

Dear New Hire,

We are excited to have you on board! As part of your onboarding process, please find the assembly directions for our telecom equipment outlined below. Following these guidelines will ensure that you can efficiently and safely assemble the equipment.

Assembly Directions

1. Ensure all safety gear is worn during the assembly process, including gloves and goggles.
2. Gather all necessary tools and components listed in the equipment kit.
3. Start by assembling the base unit:
 - Attach the power supply securely.
 - Connect the main circuit board to the base.
4. Proceed to attach the antennas:
 - Mount the antennas at the designated locations.
 - Ensure they are tightened appropriately.
5. Connect all cables following the color-coded system.
6. Perform a final inspection to ensure all components are securely installed.

If you have any questions, please feel free to reach out to your supervisor or refer to the equipment manual.

Best regards,
Your Team
