

Instructions for Setting Up Your Telecom Device Connectivity

Dear User,

We are pleased to provide you with the instructions for connecting your telecom device. Please follow the steps below to ensure a successful setup.

Step 1: Unbox Your Device

Carefully remove the telecom device and all included accessories from the packaging.

Step 2: Connect to Power

Plug the power adapter into the device and then into an electrical outlet.

Step 3: Connect to the Internet

For wired connections, use an Ethernet cable to connect the device to your router. For wireless connections, follow the prompts on the device's display to select your Wi-Fi network and enter the password.

Step 4: Power On the Device

Press the power button on the device to turn it on. Wait for the initial setup to complete.

Step 5: Configure Your Settings

Access the device settings via the dedicated app or web portal. Enter the necessary account credentials as provided with your order confirmation.

Step 6: Test the Connection

Once configured, perform a test call or use the connectivity diagnostic tool available in the settings.

If you encounter any issues, please refer to the troubleshooting section in the user manual or contact our support team.

Thank you for choosing our telecom services!

Best regards,

Your Telecom Provider Team
