

Invitation to Genetic Counseling

Dear [Patient's Name],

We are reaching out to invite you to participate in a genetic counseling session aimed at assessing your risk for hereditary cancer.

As part of your ongoing health care, we understand the importance of understanding your genetic background, especially concerning cancers that may run in your family. A genetic counselor will work with you to discuss:

- Your personal and family medical history
- Potential risks of hereditary cancers
- Genetic testing options if applicable
- Guidance on prevention and early detection strategies

Please let us know your availability for a session. We can accommodate both in-person and virtual consultations.

To confirm your appointment or if you have any questions, please contact us at [Clinic's Phone Number] or [Clinic's Email Address].

We look forward to assisting you in understanding your health better.

Sincerely,

[Your Name]
