

Dear [Patient's Name],

We are committed to your health and well-being. This brochure outlines important information regarding prostate screening and potential treatment options.

Prostate Screening

Regular screening is essential for early detection of prostate conditions. The following methods are commonly used:

- Digital Rectal Examination (DRE)
- Prostate-Specific Antigen (PSA) Test

Understanding Your Results

Your screening results will provide crucial insights into your prostate health. Our team will help you understand the next steps based on your results.

Treatment Options

In the event that treatment is necessary, there are several options available:

- Active Surveillance
- Radiation Therapy
- Surgery
- Hormonal Therapy

Next Steps

Please contact our office to schedule your screening or to discuss any questions you may have about your health.

Thank you for choosing us as your healthcare provider.

Sincerely,

[Your Name]
