

# Laser Eye Treatment FAQs

Dear Prospective Patient,

Thank you for considering laser eye treatment with us. Below are some frequently asked questions that may help you in making your decision:

## **1. What is laser eye treatment?**

Laser eye treatment, also known as LASIK, is a surgical procedure that reshapes the cornea to improve vision.

## **2. Who is a good candidate for this procedure?**

Good candidates are usually over 18 years old, have stable vision, and are free of eye conditions.

## **3. How long does the procedure take?**

The procedure typically takes about 15-30 minutes for both eyes.

## **4. Is the treatment painful?**

Most patients report minimal discomfort during the procedure, and numbing drops are used to ensure comfort.

## **5. What is the recovery time?**

Recovery is usually quick, with many patients returning to normal activities within a day.

## **6. Are there any risks involved?**

As with any surgery, there are risks, including dry eyes, glare, and fluctuating vision.

If you have any further questions or would like to schedule a consultation, please do not hesitate to contact us.

Sincerely,

Your Eye Care Team
