

Request for Proposal: Bilingual Assessment Tools

Dear [Recipient's Name],

We are reaching out to solicit proposals for the development of bilingual assessment tools aimed at supporting our multilingual student population. As our school continues to embrace diversity and inclusion, it has become increasingly clear that effective assessment methods must cater to the varied linguistic backgrounds of our students.

The purpose of this request is to identify evidence-based assessment tools that are capable of providing accurate insights into our students' academic performance while accommodating their unique language needs. We are particularly interested in tools that:

- Are validated for use with bilingual students.
- Include translations for key assessment components.
- Utilize culturally relevant materials.
- Provide data that can inform instructional practices.

We would appreciate it if you could submit your proposals by [submission deadline]. Your proposal should include detailed information on the tools you offer, as well as your experience in developing and implementing bilingual assessments in similar educational settings.

Thank you for considering this opportunity to support our students. We look forward to your response.

Sincerely,

[Your Name]
