

Summer Cooling Guidelines for Tenants

Dear Tenants,

As the summer months approach, we would like to provide you with some important guidelines to ensure your comfort and the efficient use of energy in our community.

1. Set Your Thermostat

Please keep your thermostat set to 75-78degF for optimal energy efficiency.

2. Use Ceiling Fans

Utilize ceiling fans to circulate air and enhance cooling without excessively lowering the thermostat setting.

3. Close Blinds and Curtains

Keep blinds and curtains closed during peak sunlight hours to reduce heat gain.

4. Report Maintenance Issues

If you experience any issues with your air conditioning unit, please report them immediately for timely repairs.

5. Stay Hydrated

Don't forget to drink plenty of water and stay hydrated during the hot days.

Thank you for your cooperation!

Sincerely,

Your Property Management Team
