

Dear Tenant,

We hope this message finds you well. To ensure your comfort in your rental unit, we would like to provide you with recommended thermostat settings.

Optimal Temperature Settings:

- During the heating season (Winter): Set the thermostat to 68degF (20degC) when at home, and lower it by a few degrees when you're away.
- During the cooling season (Summer): Set the thermostat to 75degF (24degC) when at home, and increase it by a few degrees when you're away.

Additional Tips:

1. Use a programmable thermostat to adjust temperatures automatically according to your schedule.
2. Keep curtains or blinds closed during hot days to maintain a cooler indoor temperature.
3. Layer clothing in winter to feel comfortable with a slightly lower temperature.

If you have any questions or concerns regarding the thermostat settings, please do not hesitate to contact us.

Thank you for your cooperation!

Best regards,
Your Property Management Team
