

Important Instructions for Thermostatic Control

Dear Residents,

We would like to provide you with some important instructions regarding the use of your thermostatic control system.

How to Adjust Your Thermostat

1. Locate your thermostat, typically found on a wall in your living area.
2. Press the 'Menu' button to access temperature settings.
3. Use the '+' and '-' buttons to adjust the temperature to your desired setting.
4. Press 'Confirm' to save your settings.

Optimal Temperature Settings

For your comfort and energy efficiency, we recommend the following temperature settings:

- Summer: 75degF - 78degF
- Winter: 68degF - 70degF

Common Issues and Troubleshooting

If you experience any issues with your thermostat, please consider the following:

- Check if the unit is set to the correct mode (Heat/Cool).
- Ensure that the thermostat batteries are not depleted.
- Verify that the air filters are clean.
