

Dear [Tenant's Name],

We hope this message finds you well. As we strive to create a comfortable and energy-efficient living space for you, we wanted to share some tips to optimize your HVAC system.

HVAC Efficiency Tips:

- **Keep Air Vents Unobstructed:** Ensure that furniture, curtains, and other items are not blocking vents to allow for proper air circulation.
- **Change Air Filters Regularly:** Replace or clean air filters every 1-3 months to maintain efficiency and air quality.
- **Seal Windows and Doors:** Check for drafts and seal any leaks to keep the cool or warm air inside.
- **Use Thermostat Wisely:** Set your thermostat to a moderate temperature. Consider using programmable thermostats if available.
- **Utilize Ceiling Fans:** Running ceiling fans can help circulate air and make your space feel more comfortable.
- **Close Blinds and Curtains:** During hot days, keep blinds closed to reduce heat gain and lower cooling costs.

By following these tips, not only will you enhance your comfort, but you will also help reduce energy consumption and costs.

If you have any questions or need further assistance, please feel free to reach out.

Best regards,
