

# Summer Upkeep Strategies

Dear [Occupant's Name],

As we approach the summer season, we want to ensure that your living environment remains comfortable and well-maintained. Here are some essential upkeep strategies to consider:

## 1. Lawn and Garden Care

- Water your plants and lawn regularly, preferably in the early morning.
- Ensure that weeds are removed consistently to promote healthy growth.
- Consider adding mulch to flower beds to retain moisture.

## 2. HVAC Maintenance

- Replace or clean air filters monthly to ensure efficient operation.
- Schedule a professional inspection for your air conditioning unit.
- Keep vents clear of obstructions for optimal airflow.

## 3. Interior Upkeep

- Check windows and doors for drafts; seal any that are not airtight.
- Ensure ceiling fans are functioning properly for better circulation.
- Consider adding blackout curtains to keep rooms cooler.

## 4. Safety Checks

- Inspect smoke detectors and replace batteries if necessary.
- Check fire extinguishers and ensure they are accessible.
- Review emergency exits and ensure they are clear of obstructions.

Thank you for your attention to these important upkeep strategies. Your cooperation helps keep our community a safe and enjoyable place to live.

Best regards,
