

Summer Home Care Recommendations

Dear Tenants,

As summer approaches, we want to ensure that your living space remains comfortable and well-maintained. Here are some recommendations for summertime home care:

1. Air Conditioning Maintenance

Check and replace air filters regularly to improve efficiency and air quality.

2. Windows and Doors

Inspect seals and weather stripping to prevent drafts and ensure efficiency.

3. Outdoor Spaces

Keep gardens and patios tidy; consider watering plants in the morning or evening to minimize evaporation.

4. Pest Control

Seal any entry points and keep food stored properly to reduce pest attraction.

5. Emergency Preparedness

Review your emergency kit and ensure it is stocked and ready for any summer storms.

Thank you for your attention to these recommendations. Enjoy your summer!

Sincerely,
