Dear Parents,

As our children engage more with the online world, it is vital to ensure they do so safely. Below are some guidelines to help you foster safe internet usage:

1. Open Communication

Encourage your child to talk about their online experiences and any concerns they may have.

2. Set Clear Rules

Establish family rules regarding internet use, including time limits and acceptable online behavior.

3. Monitor Online Activity

Keep computers in shared spaces and monitor your child's internet activity without being intrusive.

4. Use Parental Controls

Utilize parental control software to limit access to inappropriate content.

5. Educate About Privacy

Teach your child the importance of not sharing personal information, including their full name, address, and phone number.

6. Encourage Critical Thinking

Help them understand the difference between reliable information and misinformation online.

7. Discuss Cyberbullying

Make sure they know the signs of cyberbullying and how to report it if they encounter it.

Thank you for your commitment to ensuring a safe digital environment for our children.

Sincerely,
