

Infant Vaccination Schedule

Dear Parents,

We are dedicated to keeping your child healthy and safe. Below is the vaccination schedule recommended for your infant:

Vaccination Schedule

Vaccine	Age (Months)
Hepatitis B	Birth, 1-2, 6-18
DTaP (Diphtheria, Tetanus, Pertussis)	2, 4, 6, 15-18
Haemophilus influenzae type b (Hib)	2, 4, 6, 12-15
Polio	2, 4, 6-18
MMR (Measles, Mumps, Rubella)	12-15
Varicella (Chickenpox)	12-15
Pneumococcal (PCV13)	2, 4, 6, 12-15
Hepatitis A	12-23

Frequently Asked Questions (FAQs)

1. Why are vaccinations important?

Vaccinations help protect your child from serious diseases and prevent outbreaks in the community.

2. Are vaccines safe?

Yes, vaccines are thoroughly tested for safety and effectiveness before being approved for use.

3. What side effects can occur?

Common side effects include mild fever and soreness at the injection site. Serious side effects are very rare.

4. Can I delay my child's vaccinations?

Delaying vaccinations can increase the risk of your child getting diseases. It's best to follow the recommended schedule.

If you have any further questions, please don't hesitate to reach out to our office.

Sincerely,

Your Pediatric Health Team
