

Post Oral Surgery Care Instructions

Dear Patient,

After your oral surgery, it is important to monitor your recovery. Please watch for the following signs:

- **Excessive Bleeding:** If bleeding does not stop within a few hours.
- **Severe Pain:** Pain that is not manageable with prescribed medication.
- **Swelling:** Swelling that increases significantly after the first 48 hours.
- **Fever:** A temperature over 101degF (38.3degC).
- **Difficulty Breathing:** Any issues with breathing or swallowing.
- **Bad Odor:** A foul smell coming from the surgical site.

If you experience any of these symptoms, please contact our office immediately.

Wishing you a smooth recovery!

Sincerely,
Your Dental Team
