

# Diabetic Foot Care Treatment Plan Overview

Date: \_\_\_\_\_

Patient Name: \_\_\_\_\_

Patient ID: \_\_\_\_\_

## Introduction

This treatment plan is designed to guide the management of diabetic foot care to prevent complications and promote healing.

## Assessment

- History of foot ulcers: Yes / No
- Neuropathy assessment: Present / Absent
- Blood circulation assessment: Good / Poor

## Treatment Goals

1. Prevent foot ulcers and infections.
2. Improve blood circulation.
3. Educate the patient on self-care practices.

## Interventions

The following interventions will be implemented:

- Daily foot inspections.
- Proper footwear recommendations.
- Regular follow-up appointments.
- Education on blood sugar control.

## Monitoring and Follow-Up

Follow-up appointments will be scheduled every \_\_\_\_\_ weeks to assess progress and make necessary adjustments to the treatment plan.

## Patient Education

Provide educational materials that cover:

- Foot hygiene practices.
- Signs of infection.
- Importance of regular podiatrist visits.
