

Peer Review Summary for Manuscript ID: 123456

Title: The Impact of Climate Change on Marine Biodiversity

Authors: Jane Doe, John Smith

Date of Submission: October 1, 2023

Reviewer's Comments:

- Overall, the manuscript provides a comprehensive overview of the topic.
- The methodology is robust and well-explained.
- Several areas for improvement were noted, including clarity and depth of certain sections.
- Figures and tables could be enhanced for better visual representation.

Recommendation:

The reviewer recommends minor revisions before publication.

Summary:

After thorough evaluation, the manuscript presents significant insights into the effects of climate change on marine ecosystems. The suggestions provided by the reviewer aim to fortify the arguments and enhance overall readability.

Final Decision:

The editorial team should consider the reviewers' feedback and decide on the next steps.

Respectfully submitted,
