Dear [Recipient Name],

I am writing to formally request the verification and accuracy of data collected during the recent national census. As an advocate for accurate representation and statistical integrity, I believe it is crucial to ensure that the data reflects the true demographics of our communities.

Specifically, I am interested in understanding the methodologies used in data collection and any measures taken to address potential discrepancies. Additionally, I would appreciate information regarding the process for citizens to report inaccuracies and the timeline for addressing such concerns.

Ensuring the accuracy of this data is vital for effective policy-making, resource allocation, and community planning. I look forward to your prompt response regarding this important matter.

Thank you for your attention to this request.

Sincerely,

[Your Name]
