Dear [Recipient Name],

I am writing to formally request the expansion of our server capacity in order to effectively support the implementation of new applications that are critical to our operations and growth strategy.

As you are aware, our current server infrastructure has been performing at near capacity, which poses a significant risk to our ability to deploy and maintain these new applications effectively. The anticipated growth in user demand, alongside the integration of [specific applications], necessitates an enhancement in our server capabilities to ensure optimal performance and reliability.

Expanding our server capacity will offer the following benefits:

- Improved application performance and response times.
- Increased reliability and uptime for critical services.
- Enhanced user experience for both employees and clients.
- Scalability to accommodate future growth and new software deployments.

After conducting a thorough analysis, I recommend that we consider options such as [suggested solutions or resources], which will ensure we meet our growing needs without disruption.

In conclusion, I believe that investing in our server capacity is essential for the sustainable growth of our business as we move forward with these new applications. I look forward to discussing this proposal further.

Thank you for considering this important request.

Sincerely,

[Your Name]
