

Questions Regarding Literature Review Methodology

Dear [Recipient's Name],

I hope this message finds you well. I am currently conducting a literature review for my research project and have a few questions regarding the methodology. I would greatly appreciate your insights on the following:

1. What criteria do you recommend for selecting sources in a literature review?
2. How do you determine the relevance of a study to your research question?
3. What strategies do you use for synthesizing information from multiple sources?
4. Can you suggest any specific databases or search engines that are particularly useful for literature reviews?
5. What are common pitfalls to avoid when conducting a literature review?

Thank you for your time and assistance. I look forward to your valuable feedback.

Best regards,
