

# Immunotherapy Side Effects Information

Date: [Insert Date]

Dear [Patient's Name],

We are reaching out to provide you with important information regarding the potential side effects of immunotherapy treatment. While immunotherapy can be an effective approach in fighting certain types of cancer, it may also cause side effects that are important to monitor.

## Common Side Effects

- Fatigue
- Skin rashes or itchiness
- Flu-like symptoms
- Nausea
- Changes in appetite

## Less Common Side Effects

- Inflammation of organs (e.g., lungs, liver)
- Autoimmune reactions
- Endocrine disorders (e.g., thyroid dysfunction)

If you experience any of these side effects or have concerns about your treatment, please do not hesitate to contact our office. It is essential to address any symptoms promptly to ensure your comfort and safety.

Thank you for your attention to this important matter. We wish you the best in your treatment journey.

Sincerely,

[Your Name]
