Subject: Retirement Plan Investment Options

Dear [Employee Name],

As you approach your retirement, we want to ensure that you are well-informed about the various investment options available to you within our retirement plan. Below are the options you may consider:

1. Target-Date Funds

These funds automatically adjust their asset allocation as you approach retirement age, providing a more hands-off investment approach.

2. Stock Funds

Investing in stock funds can potentially offer higher returns, though they come with greater risk. Consider your risk tolerance when selecting this option.

3. Bond Funds

Bond funds are generally more stable and can provide a steady stream of income, which may be suitable for retirees seeking lower risk.

4. Money Market Funds

For those looking for liquidity and safety, money market funds offer a secure place to park cash, though with lower returns.

5. Alternative Investments

These options may include real estate or commodities. They can provide diversification but may require more management.

Please take the time to review these options and consider your personal financial situation and retirement goals. If you have any questions or require further assistance, do not hesitate to reach out.

Best Regards,
