Subject: Troubleshooting Guide for Boiler Issues

## Introduction

This guide outlines the common issues that may arise with your boiler and provides troubleshooting steps to help resolve them.

## Common Boiler Issues

- **No Heat:** Check the thermostat settings and ensure power is on.
- **Strange Noises:** Inspect for air in the system or low water levels.
- **Leaking Water:** Examine the pressure relief valve and joints for leaks.
- **Foul Smells:** Investigate for gas leaks or electrical issues.

## Troubleshooting Steps

1. Verify that the thermostat is set to the desired temperature.
2. Inspect the boiler's power supply and circuit breakers.
3. Look for visible signs of leaks or corrosion.
4. Consult the boiler's user manual for error codes and diagnostics.

## When to Call a Professional

If the issues persist after troubleshooting, contact a licensed technician for assistance.
