

Utility Safety Tips During Inclement Weather

Dear [Recipient's Name],

As we approach the season of inclement weather, we want to ensure you stay safe and prepared. Here are some important utility safety tips to follow:

1. Stay Informed

Monitor weather reports frequently and stay updated on storm warnings in your area.

2. Prepare an Emergency Kit

Have a kit ready that includes water, canned food, flashlights, a first aid kit, and necessary medications.

3. Avoid Using Candles

In case of power outages, use flashlights instead of candles to reduce fire hazards.

4. Do Not Touch Downed Power Lines

If you come across downed power lines, stay at least 30 feet away and report them immediately.

5. Unplug Electrical Appliances

Before a storm hits, unplug appliances to prevent damage from power surges.

6. Use Generators Safely

If you use a generator, ensure it is placed outside, away from windows and vents to avoid carbon monoxide poisoning.

We hope these tips help you and your family stay safe during inclement weather. If you have any questions, please feel free to reach out.

Stay safe,
