

# Summer Utility Preparation Tips

Dear Homeowner,

As the summer months approach, it's important to prepare your home for the heat and ensure that your utilities are functioning optimally. Here are some helpful tips:

## 1. Check Air Conditioning

Ensure your air conditioning system is serviced and filters are replaced to maintain efficiency.

## 2. Inspect Insulation

Check insulation in your attic and walls, and consider adding more if necessary to keep your home cool.

## 3. Seal Windows and Doors

Inspect for drafts and seal any gaps to prevent cool air from escaping.

## 4. Test Smoke and Carbon Monoxide Detectors

Make sure your detectors are in working order to ensure safety during summer activities.

## 5. Prepare for Storms

Review your emergency plan and check that your backup generator is functioning properly.

By following these tips, you can ensure a comfortable and safe summer in your home. If you have any questions or need assistance, feel free to reach out.

Sincerely,

Your Utility Provider
